BioGrow

Bio-stimulant & fertilizer booster

BioGrow provides a simple but effective method of feeding and stimulating the beneficial soil biomass, it combines a number of natural products (including kelp & organic acids) to maximise biological development.

BioGrow also introduces a range of plant growth hormones and enzymes to encourage plant growth.

BioGrow

- ◆ Is a natural soil conditioner
- ◆ Contains 13% Humic acid— which provides food and stimulates soil biology, also stabilises nutrients within the soil reducing losses from leaching
- ◆ Builds the levels of soil organic Carbon & CEC
- ◆ Increases effectiveness of fertilizer programs
- ◆ Works in conjunction with Inoculants like Soil & Plant Tonic
- ◆ Rebuilds & rejuvenates beneficial organisms and begins the process of recovering biologically weak or tired and depleted soils

	Sandy Soil	Loamy Soil	Clay Soil	Garden beds & Pots	Home lawns
Drench	20L/ha Monthly	10-20L/ha Monthly	10-20L/ha Bi-Monthly	5ml/1L water Monthly	100ml/100m2 Bi- Monthly
