

# Triple Ten

N	P	K
10.48%	10.23%	10.69%

**Triple 10** is a liquid fertilizer combining a hot mix N-P-K blend, chelated trace elements and natural growth promoters. These natural growth promoters include fulvic acid, kelp-based fertilizer and vitamins. **Triple 10** represents state-of-the-art, plant specific fusion nutrition.

**Triple 10** Increases resistance against stress and improves recovery from wear by combining a balance of three of the most needed plant nutrients Nitrogen, Phosphorus and Potassium.

Organic chelating and complexing agents are used in the manufacturing of this product to facilitate efficient absorption and translocation within plant tissue, resulting in fast uptake and response.

## Application Rates:

**Foliar minimum dilution** 1 :100

### Foliar Spray:

1 litre per 100 litres of water, apply up to 500 ml per 1000m<sup>2</sup>, every 2 – 4 weeks or as required

### Fertigation:

Apply 300 ml – 1.0 litre per 1000m<sup>2</sup> every 2 – 4 weeks or as required during the growing season, or at periods of high stress and nutrient demand.

**FOR OTHER CROPS** - APPLY 3-5 litres/Ha (TWICE) OR SEEK THE ADVICE OF YOUR DEALER.

## COMPATIBILITY:

Triple 10 Turf is compatible with most agricultural chemical and fertilizers; however it is advised that a small compatibility test be done before mixing with other farm chemicals.
