

# BrixBuilder Soluble

**Soilsmart**

*Soil and Plant Management*

**BrixBuilder Soluble** contains the three major plant nutrients - **N, P and K** that need to be maintained within the plant throughout the active stages of plant growth and supports Brix building capacity within the plant.

**Nitrogen and Potassium** ensure that most plant functions are properly supported. Trace elements have been included and complexed with **Fulvic acid** and **Mannitol** to optimise uptake and to provide the basis for strong plant growth above and below the surface.

**Fulvic acid** dramatically improves absorption of nutrients into the plant and the presence of **Mannitol** provides growth stimulation and aids the movement of nutrients within the plant.

| N     | P     | K    | Turf Grass   | Cut Flowers                                       | Field Crops                                    | Greenhouse Crops   | Stone Fruit  |
|-------|-------|------|--|---|--|--|--|
| 10.5% | 25.5% | 8.2% | 4 - 5kg/ha as a foliar following renovation or when roots need stimulation | 300 - 400g/100L water 2 - 3 weeks before each cut | 2 - 3kg/ha approx. 10 - 14 days before harvest | 300 - 400g/100L water commencing pre flowering, repeat every 2 - 3 weeks | 2 - 3kg/ha (depending on canopy) when fruit reaches half size then 10 - 14 days before picking |

Directions for use :

- Store in a cool place away from direct sunlight
- Keep lid firmly closed after each use
- Avoid contact with eyes, if swallowed seek medical advice
- Keep away from children and animals

**10 kg**
