

# Liquid Fish

## Natural Fish Fertilizer

**Liquid Fish** is manufactured using a low temperature natural enzyme process to preserve the nutritional value of the proteins and key nutrients. Making the nutrients immediately available to the plant.

**Liquid Fish** is a concentrated biological stimulant which will revitalise soils and re-invigorate the root systems of most plants.

**Liquid Fish** is an organic product that will also help relieve stress in plants.

Benefits of **Liquid Fish** include :

- Supply of natural nutrients that are immediately available to the plant
- Promotes beneficial microbial activity
- Has natural chelating properties
- Less leaching compared to chemical fertilizers
- Promotes healthier plants with increased resistance to disease

Nitrogen	Phosphorous	Potassium	Calcium	Magnesium	Sulphur	Proteins	pH
5%	0.65%	1.32%	0.19%	0.11%	1.65%	16%	2.2–4.2

Turf Apply as a drench	Garden beds & Pots	Home lawns
5-7L/ha in 400-600L water Irrigate with 3-5mm	20ml/10L water	70ml /100m2 Water in well
