

Micro-Gyp

Soilsmart

Soil and Plant Management

Micro-Gyp contains micronised Calcium Sulphate (particles less than 5 micron dia) with Fulvic acid in a free flowing liquid suspension. The addition of Fulvic acid increases mineral uptake. **Micro-Gyp** is Nitrogen free and will not lead to unwanted vegetative growth.

The tiny particles in **Micro-Gyp** will not clog filters, however the spray tank should be constantly agitated to prevent settling. Foliar applications may leave a residue on leaves, so spraying in advance of harvest or washing with overhead irrigation prior to harvesting may be necessary.
