

OC-Calcium

(Organically Chelated Calcium)

Soilsmart

Soil and Plant Management

OC Calcium contains the essential trace element Calcium (Ca) to correct and prevent Calcium deficiencies. **Calcium** is important in the movement of most minerals within the plant. It is also critical for cell development and cell strength and aids in the process of disease resistance.

Organic chelating and complexing agents are used in the manufacturing of this product to facilitate

	Greens & Tees	Sportsturf	Lettuce (Tip Burn)	Cut Flowers (Soft stem)	Potatoes (Hollow Heart)	Greenhouse Crops	Stone Fruit (Soft Tip/Soft fruit)	Tomatoes (Blossom End Rot)
Ca								
20%	5 - 10g/100m2 as required	50- 100g/ha as required	450g/ha at 4 - 6 leaf stage, 800g at flowering	200g/100L water 2 - 3 weeks after each cut	550g/ha at 6 - 7 leaf stage, 800g at flowering	200g/100L water every 2 - 3 weeks commencing pre flowering	450 - 550g/ha when fruit reaches half size then 10 - 14 days before picking	450 - 550g/ha at first cluster set. Repeat every 2 - 3 weeks

Directions for use :

- Store in a cool place away from direct sunlight
- Keep lid firmly closed after each use
- Avoid contact with eyes, if swallowed seek medical advice
- Keep away from children and animals
- **OC-Calcium** is compatible with most agricultural chemical and fertilizers. It is advised that a small compatibility test be done before mixing with other farm chemicals
