Plant/Crop
Sample name / reference number

Date of sample (AM) Time sample taken:
Date of sample (PM) Time sample taken:

Fertiliser or chemical applications can have an impact on results please include details of any applications, within the week prior to sampling.

Pesticides
Fertilizers
Herbicides
Other

Please advise us once you have posted the sample(s).

Sampling notes

Two separate samples (AM & PM) of leaf material are required.

The (AM) sample should be taken early in the morning before the sun has a chance to influence growth (either before sunrise or within the first two hours after sunrise is best).

The (PM) sample should taken as late as possible in the day (4.00pm - 5.00pm) and should only be submitted if it has been exposed to a minimum 4 - 5 hours of full sunshine during during the day (avoid windy days).

Sample size - seal samples in a 'zip lock' plastic lunch bag (about half full if possible)
Place in the fridge if you need to hold overnight, before Express Posting them.

Clearly mark each sample immediately after being taken, as **AM or PM**, include identification and enclose the submission form.

Any other notes or comments regarding current growth issues or conditions
