

# SoilSafe Boron Granules

**Soilsmart**  
Soil and Plant Management

**SoilSafe** Boron Granules are made up from Boron as B<sub>2</sub>O<sub>3</sub> which has been fused with humates to stabilise what is traditionally the most unstable of the trace elements and is easily leached from the soil, particularly in low humus soils.

The Boron in **SoilSafe** Boron Granules is complexed into a humate colloid to create a slow-release response. Boron increases Calcium efficiency, and like Calcium, is involved in cell wall strength and is important in the transfer of carbohydrates within the plant which is essential for good root development.

B	Humic Acid
3.23%	57.5%

Turf Apply to open turf
1kg - 3kg per 1000m <sup>2</sup> incorporated into the soil via core holes or similar

Directions for use :

- Store in a cool place away from direct sunlight
- Keep lid firmly closed after each use
- Avoid contact with eyes, if swallowed seek medical advice
- Keep away from children and animals

**25 kg**
